Reviewer's report

**Title:** Influence of acute pancreatitis on the responsiveness of rat mesenteric and pulmonary arteries

**Version:** 2  **Date:** 28 April 2008

**Reviewer:** Werner Hartwig

**Reviewer's report:**

Camargo et al have answered some but not all issues that have been raised. Importantly, no in vivo data has been provided. Therefore, I would strongly suggest that "in vitro" is included in the title and also in the first sentence of the discussion.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
