Reviewer's report

Title: Neoplastic transformation of rat liver epithelial cells is enhanced by non-transferrin-bound iron.

Version: 2 Date: 19 November 2007

Reviewer: Debbie Trinder

Reviewer's report:

General
All concerns were adequately addressed in the revision of the manuscript

---------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
