Reviewer’s report

Title: Bile Reflux Index After Theurapeutic Biliary Procedures

Version: 1 Date: 11 December 2007

Reviewer: Tomita Ryouichi

Reviewer’s report:

I think that this manuscript is interesting. However, there are some problems.
1) It is better for you to describe patient’s background factor in detail (for example, functional gastrointestinal disorders, peptic ulcer, and so on).
2) What time did you carry out these examinations?
3) What kind of methods should you perform to clarify the etiologies of DGR in future?
4) Remove M/F% in Tables 1 and 2.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
