Reviewer’s report

Title: Validation study of villous atrophy and small intestinal inflammation in Swedish biopsy registers

Version: 3 Date: 26 January 2009

Reviewer: Riccardo Troncone

Reviewer’s report:

The Authors should be congratulated for the effort made to comply with the referees requests. This paper is a useful piece of information for clinicians, pathologists and epidemiologists. The subtitle headings help to follow the result section and the discussion now revises critically the most debatable issues. In conclusion the paper looks now suitable for publication.
