Reviewer's report

Title: Effects of esomeprazole treatment for gastroesophageal reflux disease on quality of life in 12- to 17-year-old adolescents: an international health outcomes study

Version: 1 Date: 16 April 2009

Reviewer: Fabio Pace

Reviewer's report:

The paper is interesting, on a relatively little investigated issue.
The study is well conducted, with appropriate analysis.
The text is fluent and the discussion complete and updated.
