Reviewer's report

Title: Phlegmonous Colitis: Another Source of sepsis in cirrhotic patients?

Version: 3 Date: 9 October 2009

Reviewer: Elena Migliore

Reviewer's report:

Minor essential revisions: there is a recent case report under reported about phlegmonous colitis in which the patient underwent an emergency laparotomy; so the sentence "...to our knowledge, this is the first report of a patient who underwent surgery for PC..." is not correct.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
