Reviewer's report

Title: A novel scoring system for prognostic prediction in d-galactosamine/lipopolysaccharide-induced fulminant hepatic failure BALB/c mice

Version: 2 Date: 25 October 2009

Reviewer: Shosuke Kojo

Reviewer's report:

Authors made additional experiments to respond to my questions and appropriately revised their manuscript.

My major question was "Authors should compare their score using small molecules with conventional parameters such as ALT, AST, LDH etc. Is their score superior to conventional parameters?"

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
