Reviewer’s report

Title: Diagnostic accuracy of plasma NT-proBNP levels for excluding cardiac abnormalities in the very elderly

Version: 2 Date: 22 October 2010

Reviewer: Thomas Mueller

Reviewer’s report:

I am not convinced by several answers of the authors and changes made in the second version of the manuscript. However, the manuscript is scientifically acceptable and, therefore, I recommend publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
