Reviewer's report

Title: Improving diaper design to address incontinence associated dermatitis

Version: 1 Date: 5 February 2010

Reviewer: Mandy Wells

Reviewer's report:

the authors might not have photo's of the subjects skin, however if they do these should be included.
The authors should state why they chose another manufacturers product rather than one of their own for the comparisons.
The authors should show a photograph of a normal pad compared to the product evaluated

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
