Reviewer's report

Title: Depression after low-energy fracture in older women predicts future falls: A prospective observational study

Version: 3 Date: 2 September 2011

Reviewer: Joan Dodson

Reviewer's report:

After reading the manuscript after revisions, I was pleased to note that all of my original comments have been addressed. The manuscript reads much clearer, and in particular the results section was far more coherent and concise. The short rewrite of the abstract and the addition of the correlation table was very helpful. In my opinion, it is an interesting and topical manuscript and I find it ready to be published.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
