Reviewer's report

**Title:** Focussing Both Eyes On Health Outcomes: Revisiting Cataract Surgery

**Version:** 1  **Date:** 3 May 2012

**Reviewer:** John Browne

**Reviewer's report:**

I have only one comment to make about the manuscript that can be passed to the authors. This study seems almost identical in objectives, methods and findings to a previous study on the subject.

The authors do not refer to this paper. I would advise them to read the paper and reflect on whether or not their study provides any advance on what we already know on this subject.

**Level of interest:** An article of insufficient interest to warrant publication in a scientific/medical journal

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
