Reviewer’s report

Title: Who are the healthy active seniors? A cluster analysis

Version: 1 Date: 6 June 2014

Reviewer: Kee-Lee Chou

Reviewer’s report:

The paper is aimed to investigate the active aging in Hong Kong older adults by clustering and discriminant analyses. There are some concerns for major compulsory revisions:

1. the meaning of active aging must be clarified e.g. what is the difference between active aging and successful aging? or productive aging?
2. limitations of the study such as sampling bias must be discussed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I know the first author in person but I declare that I have no competing interest.
