George Heckman (heck0@sympatico.ca)
Norman Flett (nflett@sjv.on.ca)

Version: 3 Date: 2 Oct 2002

Reviewer: Dr David Hogan

Level of interest: A paper of limited interest

Advice on publication: Other (see below)

I have reviewed the letter from the authors and the new draft. I feel the authors have responded as best they could to my concerns and would support its publication. One minor comment - I'd ask them to look at their wording for the heading of Table 1. As currently worded it is confusing. They removed items from the published McLeod criteria. As currently written it could be interpreted that McLeod removed the items.
