Reviewer’s report

Title: Functional assessment of older patients in the emergency department: comparison between standard instruments, medical records and physicians perceptions.

Version: 5 Date: 10 August 2006

Reviewer: Andreas Stuck

Reviewer’s report:

General
The authors have extensively reviewed the manuscript and have now adequately addressed all reviewer comments. I would like to congratulate them for a relevant contribution to the field.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
none

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
none

Discretionary Revisions (which the author can choose to ignore)
none

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes
