Reviewer’s report

Title: Determinants of physiotherapy provision in a population of elderly nursing home residents; a cross sectional study.

Version: 1 Date: 6 December 2006
Reviewer: Boris Bershadsky

Reviewer’s report:

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
1. Sampling strategy and the sample size determination have to be described in more details. Taking into account that the results have to be extrapolated from the sample of 600 patients and 15 nursing homes to the entire population, representativeness of the sample and generalizability of results have to be discussed.
2. Abbreviations related to all tables should be clarified.

What next?: Accept after minor essential revisions
