Reviewer's report

Title: A new method to assess perceived well-being among elderly people - a feasibility study

Version: 5 Date: 17 November 2009

Reviewer: katariina hinkka

Reviewer's report:

The authors have adequately responded my criticism. I have just a single minor comment left:

Discretionary Revisions

Since the RAVA is a national measuring instrument, the range of the index values of the measure should be given, e.g. parentheses in the sentence page 6 line 5: ... received a RAVA index score( ) of their overall health.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
