Reviewer's report

Title: Patient-Reported Treatment Burden of Chronic Immune Thrombocytopenia Therapies

Version: 2 Date: 23 July 2011

Reviewer: gregory cheng

Reviewer's report:

Discretionary Revisions- side effects of corticosteroids may be related to the dose and duration of treatment, it would be helpful if the authors can provide data on steriods dose and treatment duration to see whether most of the side effects were reported by subjects on a higher dose of corticosteroids.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
