Reviewer's report

Title: Community acquired bacterial meningitis in Cuba: a follow up of a decade.

Version: 1 Date: 23 September 2009

Reviewer: N Dash

Reviewer's report:

COMMENTS: The objective of the study seems quite highlighted and the methods used are appropriate and well described. The discussion and conclusions are balanced and adequately supported by the data. The authors appropriately attempted to discuss the limitation of the study. The references are recent and fitting.

CONCLUSION: Very careful study because of appropriate methodological approach and proper analysis.

DECISION: Accept without revision.

DECLARATION: I declare that I have no competing interests.
