Reviewer's report

Title: IgG-index predicts neurological morbidity in patients with infectious central nervous system diseases

Version: 2 Date: 9 June 2010

Reviewer: Justin Green

Reviewer's report:

Minor essential revisions:
The authors have resubmitted their manuscript in a much revised form. I have the following comments to make:
1. The abstract should make it clearer that the baseline index is the key prognostic feature of their examination of the CSF.
2. Why was an index of 0.75 chosen, can they give a reference?

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am employed by GlaxoSmithKline but am not aware we are working on issues in this manuscript.
