Reviewer's report

**Title:** Lymphocyte and monocyte flow cytometry immunophenotyping as a diagnostic tool in uncharacteristic inflammatory disorders

**Version:** 2  **Date:** 16 June 2010

**Reviewer:** Jan Ehrchen

**Reviewer's report:**

The authors addressed all questions raised in my initial report. The according changes make it much more easier to access the novelty of their results as well as the potential of the described method as a new diagnostic tool.

Therefore I recommend publication of the revised manuscript in BMC Infectious Diseases.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
