Reviewer's report

Title: Predictors of persistently positive Mycobacterium-tuberculosis-specific interferon-gamma responses in the serial testing of health care workers

Version: 2 Date: 19 July 2010

Reviewer: Alamelu Raja

Reviewer's report:

Now I have seen the response to reviewers’ comments and the revised text. The authors have satisfactorily modified the manuscript and it can be accepted.

Thank you for giving me an opportunity to review the manuscript.
