Reviewer's report

Title: In vivo expression of innate immunity markers in patients with mycobacterium tuberculosis infection

Version: 2 Date: 6 June 2010

Reviewer: Gerhard Walzl

Reviewer's report:

The authors have conducted the requested revisions. Although the linguistic aspects have been addressed to some extent, the manuscript still needs extensive attention in this regard before it is fit for publication. The grammatical and stylistic deficiencies are quite numerous and I have not listed these.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
