Reviewer's report

Title: Chronic hepatitis caused by persistent parvovirus B19 infection

Version: 2 Date: 22 June 2010

Reviewer: Tsai-Ching Hsu

Reviewer's report:

Major Compulsory Revisions:
This paper is a case report regarding the association of "persistent B19 infection and chronic hepatitis". However, many important findings about "chronic hepatitis and B19 infection" (ex: Hsu et al, 2005; Wang C, 2009) and "Hepatocyte and B19 infection" (ex: Poole et al, 2004, 2006) are not discussed and cited. In addition, Fig 1. should be modified because it is not easy for reader to find out.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
