Reviewer's report

Title: Seroepidemiology of pandemic influenza A (H1N1) 2009 virus infections in Pune, India

Version: 1 Date: 11 May 2010

Reviewer: mohsen moghadami

Reviewer's report:

1) describe type of clustering for dengue fever sampling, what is sample size? is it cluster sampling?
2) method of HI test need more precise definition. the most important point is source and type of used antigen
3) describe limitation of work exactly.
4) references need writing as Vancouver method and more recent articles published and need adding these papers.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
