Reviewer's report

Title: Human papillomavirus (HPV) types 16, 18, 31, 45 DNA loads and HPV-16 integration in persistent and transient infections in young women.

Version: 3 Date: 8 October 2010

Reviewer: Marc Baay

Reviewer's report:

I am fully satisfied by the replies from the authors and the changes made to the manuscript. The only minor point remaining is that in the legend to Table 1 it says ND, whereas in the Table ND is not used. After this has been corrected the paper can be accepted for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
