Reviewer’s report

**Title:** Incidence of anogenital warts in Germany: a population-based cohort study

**Version:** 1  **Date:** 5 October 2010

**Reviewer:** Nyaradzai Edith Kurewa

**Reviewer’s report:**

There are minor essential revisions in the layout of the manuscript which I trust the authors can address. Also if they can mention something about confidentiality of information used and the ethical considerations and permission to access information gathered for a different purpose of insurance then being used to answer a medical research question.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare that I have no competing interests.
