Reviewer's report

Title: Occult Hepatitis B Virus infection in ART-Naive HIV-Infected Patients seen at a Tertiary Care Centre in North India

Version: 3 Date: 10 September 2009

Reviewer: Phyllis C Tien

Reviewer's report:

In this revised manuscript, the authors seem to have addressed the comments of all the reviewers, including substantially revised tables and the addition of more data in results to give the reader a better understanding of the population, and a section on the limitations of the study in the discussion. There are typos noted particularly in the discussion section.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
