Reviewer's report: General comments to the authors:
Interesting case report to published
Improve English by a native English speaker Specific comments to the authors:
Case report:
-What was the origin of the patient ?
- 2 days prior the planned procedure is better Two days……
- Mebendazole 400 mg BID preoperatively: how many days ????
- Why Mebendazole not albendazole or association albendazole plus praziquantel ???
Discussion:
Is important to explain geographical repatition of the disease.
More precision about the treatment:
- Albendazole dosis pre and postoperatively
- Mebendazole also
- Albendazole versus mebendazole(mebendazole less efficaciuos) see Donald P McManus, Wenbao Zhang, Jun Li, Paul B Bartley : echinococcus . THE LANCET • Vol 362 • October 18, 2003
- Albendazole versus albendazole plus praziquantel(cobos et al 2003 and other authors)
