Reviewer's report

Title: Incident genital infections with high- and low-risk human papillomavirus (HPV) infections among mothers in the prospective Finnish Family HPV Study

Version: 1 Date: 14 July 2010

Reviewer: R Marshall Austin

Reviewer's report:

This is a thorough and thoughtful report on the genotypes of HPV detected in young recently delivered mothers. It is a useful addition to the literature and raises several areas of needed additional research.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
