Reviewer's report:

Thanks to the authors for revising the manuscript thoroughly. I would suggest a minor revision for the authors. Since they did not use a randomization method to choose their sample, instead of using the term "randomly selected students" they should better use the term "a convinience sample of students".

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
