Reviewer's report

**Title:** Intracardiac left atrial tuberculoma in an eleven-month-old infant: case report

**Version:** 1  **Date:** 11 October 2011

**Reviewer:** James Whitehorn

**Reviewer's report:**

This is a very interesting case report that I enjoyed reading. The manuscript does need a few grammatical and spelling corrections that I have detailed below. In addition please confirm who gave consent (point 10 below)

**MINOR ESSENTIAL REVISIONS**

1. Page 4 Line 1: PCR was positive is better than "PCR resulted positive"
2. Page 4 Line 4: Radiology supports TB diagnosis but does not confirm it - please consider rephrasing this
3. Page 4 Line 12: grandmother not "granmother"
4. Page 4 Final paragraph: consider splitting 1st sentence of this paragraph into 2 sentences, and remove "and then"
5. Page 5 Line 5: murmur not "murmure"
6. Page 5 Line 13: remove "potential"
7. Page 5 Line 16: supported by is better than "confirmed with"
8. Page 5 Line 19: This confirms not "this confirm"
9. Page 5 Line 21: have a less than 15% probability of having an AFB smear positive gastric aspirate not "have less than 15% probability to have gastric aspirate AFB smear positive"
10. Page 6 Line 1: do you mean written consent from the parents? Please can you clarify this

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
