Reviewer's report

Title: Intracardiac left atrial tuberculoma in an eleven-month-old infant: case report

Version: 1 Date: 17 October 2011

Reviewer: Catherine Roberts

Reviewer's report:

This is a well written report on an interesting case. The clinical case is describe well, logically and in appropriate detail. A good summary has been written tying together the unusual aspects of the case.

There were no major revisions.

There are a few minor essential revisions. These are as follows:
- Case Presentation, paragraph 2, final sentence 'A source case into the family was investigated'. The meaning of this is unclear and needs to be re-written.
- Case presentation, paragraph 3, line 1: the spelling of murmur not murmure
- Case presentation, paragraph 5, final sentence: Grandmother rather than granmother
- Case presentation, paragraph 6, 1st sentence: ECHO were performed. This is grammatically incorrect and should be 'Echocardiograms were performed...'
- Discussion, paragraph 4, final sentence: again murmur rather than murmur

There are no discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
