Reviewer’s report

Title: Factors associated with non-adherence to Artemisinin-based Combination Therapy (ACT) to malaria in a rural population from holoendemic region of western Kenya

Version: 2 Date: 14 May 2012

Reviewer: Douglas Curran-Everett

Reviewer’s report:

I appreciate your responses to my comments. But I did not make myself clear on the rounding of P values. P values greater than 0.01 can be rounded to the nearest hundreth, For example, in the Abstract, Results, line 3, P = 0.011 can be rounded to P=0.01. P=0.017 can be rounded to P=0.02. P values in the Tables (for example, Table 5) can be rounded in a similar way.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
