Reviewer's report

Title: Probable Late Lyme disease: An atypical manifestation of untreated Borrelia burgdorferi infection.

Version: 2 Date: 4 February 2012

Reviewer: Brian Fallon

Reviewer's report:

The authors have addressed all of my comments/concerns adequately. This article represents a valuable contribution to the field.

Minor essential revision:
On page 11, at the end of the top paragraph, there appears to be a typo. PTLDS should not be included in the parentheses preceding <.001 for the age of onset sentence.

No other changes suggested.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I have no competing interests.
