Reviewer's report

Title: Pyogenic brain abscess, a 15 year survey

Version: 2 Date: 2 September 2012

Reviewer: Narong Auvichayapat

Reviewer's report:

Minor Essential Revisions

1. There are a lot of spelling mistakes such as metronidazol (page 3), clindamycine, vancomycine, cephalosporine (page 7 and others), succes (page 11)
2. There are some inconsistent words e.g. burrhole vs burr-hole (page 7,8), brain abscess vs cerebral abscess vs cerebral abscess vs intracerebral abscess in the same article.
3. Wrong word: (<1.000 cells/µl) pleocytosis. Did you mean (<1,000 cells/µl) pleocytosis?
4. There is no description of the last figure.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
