Reviewer’s report

Title: Virologic versus immunologic monitoring and the rate of accumulated genotypic resistance to first-line antiretroviral drugs in Uganda

Version: 2 Date: 15 November 2012

Reviewer: Maurizio Zazzi

Reviewer’s report:

1. [minor essential revision] Page 8. Since genotyping was performed at different time points in the VLM and IM group, I would also report the comparison between the rate of drug resistance observed in the VLM group at month 36 and the rate of drug resistance observed in the IM group.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
