Reviewer's report

**Title:** CD4 lymphocyte dynamics in Tanzanian pulmonary tuberculosis patients with and without HIV co-infection

**Version:** 2  **Date:** 18 February 2012

**Reviewer:** Justin Green

**Reviewer's report:**

This is a re-review:

1. Typo on page 4: "seemed not the be retrieved"
2. Typo on page 4: "PTB patients (clinical trial... - no closed brackets
3. Typo on page 6: "normality of continuous variables."
4. Spelling on page 6: "oneway analyses of varience"

etc - suggest the authors reread the manuscript carefully again for these issues.

Discussion still does not go through results point by point and put them in context of literature but is better than before.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

As before - employed and hold stock in GSK
