Reviewer's report

Title: Epidemiological and Clinical Features of Human Rabies Cases in Bali 2008-2010

Version: 3 Date: 6 February 2012

Reviewer: Madhusudana Shampur

Reviewer's report:

3. As the paper gives an extremely important and timely information on the sudden epidemic of rabies which occurred in Bali, The paper may now be published.

Reviewer's comments and final decision:

Major compulsory revisions:

1. The authors have substantially changed the style and presentation of the manuscript as suggested. However, use of English not appropriate in some places (This may be looked into by the editors)

2. As suggested, Materials and Methods have been modified in relation to FAT PCR etc. Figures for PCR given.

Minor revisions: Adequately addressed by the authors

Final conclusion: As the paper gives an extremely important and timely information on the sudden epidemic of rabies which occurred in Bali, The paper may now be published.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
