Reviewer's report

Title: Seroepidemiology of Toxoplasma gondii infection in women of child-bearing age in Central Ethiopia

Version: 5 Date: 15 October 2012

Reviewer: Jitender P Dubey

Reviewer's report:

This paper needs editing to consize it. There is no need to compare results with other surveys outside Ethiopia. Any information on prevalence of Toxoplasma in cats from Ethiopia will be useful to readers.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
