Reviewer's report

Title: Evaluation of PCR procedures for detecting and quantifying Leishmania donovani DNA in large numbers of dried human blood samples from a visceral leishmaniasis focus in Northern Ethiopia.

Version: 4 Date: 11 February 2013

Reviewer: Gustavo Romero

Reviewer's report:

Most of the revisions were made. Otherwise, authors justified properly. The statistical issue was clarified and there is no need of statistical review anymore.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
