Reviewer's report

Title: Prevalence of self-reported tuberculosis, knowledge about tuberculosis transmission and its determinants among adults in India: a nation-wide cross-sectional household survey

Version: 1 Date: 26 July 2012

Reviewer: Muhammad Khurram

Reviewer's report:

Minor Essential Revisions
From title and methods it seems that the survey was conducted by the authors which is not the case as it is a sub-analysis. The title should be modified keeping in mind this context. Methods and results require brevity in the same context, as except for determinants of correct knowledge of TB, every thing is available on-line.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
