Reviewer's report

Title: Serum IL-10 as a marker of severe dengue infection

Version: 2 Date: 25 May 2013

Reviewer: Yadunanda Kumar

Reviewer's report:

Major compulsory revisions:
None.

Minor essential revisions:
Despite pointing this out in previous review, the authors have still not ensured their figure labels match. They make no mention of figures 3, 5 and 7 in the text. The figures are labeled 1-7 while legends call out 1A 1B etc.

Discretionary Revisions
I realise this was in response to other reviewer's comments that I certainly respect, but this manuscript may be easier to read if the data is mainly restricted to figures and not laid out within the results section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
