Reviewer's report

Title: Use of genotyping based clustering to quantify recent tuberculosis transmission in Guadeloupe during a seven years period: analysis of risk factors and access to health care

Version: 2 Date: 8 July 2013

Reviewer: Sebastien Gagneux

Reviewer's report:

The authors addressed all my comments except number 3: Why not perform the relevant multivariate analyses to find out whether these explanatory variables are independent of each other?

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
