“Differential arthritogenicity of Staphylococcus aureus strains isolated from biological samples”

Thank you very much to invite me to review the revised manuscript by Colavite PM et al.

In the revised manuscript I consider that the authors have answered all the points sufficiently well to allow their manuscript to be published.

Major compulsory revisions: the authors have revised and answered all the suggested points.

Discretionary Revisions: all the recommendations have been explained by the authors.

Minor Essential Revisions: the authors have done the suggested change.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I do not have competing interest in relation to this paper that I have reviewed.
