Reviewer's report

Title: Herpes Zoster surveillance using electronic databases in the Valencian Community, Spain.

Version: 1 Date: 22 April 2013

Reviewer: Angel Gil

Reviewer's report:

Should improve the quality of the tables because there is too much information and not appreciated clearly. Maybe they should point out or mark the most relevant aspects.

You could make a brief analysis of the disease costs to analyze the potential impact of vaccination.

Enlarge the literature with disease burden studies done in and out of Spain.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
