Reviewer's report

Title: Nevirapine versus Efavirenz-based highly active antiretroviral therapy regimens in antiretroviral-naive patients with HIV and Tuberculosis infection in India: A Randomized Control Trial.

Version: 3 Date: 24 July 2013

Reviewer: Weerawat Manosuthi

Reviewer's report:

Due to small sample size of the study and very low power of test, it had better to use "A pilot study" instead of "A RCT" in the title.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
