Reviewer's report

Title: Cost of Illness for Cholera in a High Risk Urban Area in Bangladesh: An Analysis from Household Perspective

Version: 2 Date: 4 October 2013

Reviewer: Luis Roman Carrasco

Reviewer's report:

The authors have implemented my suggestions and I think that paper is acceptable.

There are some minor issues that the authors might want to look at:
- Please spell out the name of your center the first time it is used in the text, even if it was spelt out in the affiliations.
- In the first line of the discussion it is 95th not 9th.
- Table 1 should have the 5th and 95th percentile as suggested, not only the text.
- Please be consistent with the space between the unit and the number. You keep using either US$ 5 or US$5.
- Data are plural, you still use it as singular in some places. Line 4 of the data analysis.
- Line numbers were not inserted. You do that in Word by going to "page layout", "line numbers", "continuous". That would make reviews easier.

Thanks

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
