Reviewer's report

Title: Maternal anaemia and duration of zidovudine in antiretroviral regimens for preventing mother-to-child transmission: a randomized trial in three African countries

Version: 1 Date: 12 July 2013

Reviewer: Newton Kumwenda

Reviewer's report:

It will be important to clarify under the limitations that these data are analyzed from a completed trial not specifically designed to assess this objective. The randomization was in the trial was probably on the primary objective as reported published earlier.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
