Reviewer's report

Title: Fluorine-18 fluoro-2-deoxy-D-glucose positron emission tomography/computed tomography scan contributes to the diagnosis and management of brucellar spondylodiskitis.

Version: 3 Date: 26 January 2013

Reviewer: Charito Love

Reviewer's report:

Minor essential revision:

Under "F-18 FDG PET/CT Protocol and Interpretation":

Please remove the second to the last sentence which reads "Positive finding was considered any increased uptake compared to the surrounding tissues". The sentence that preceded this has adequately addressed this issue.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
