Reviewer’s report

Title: Immunological and parasitological response in chronic Chagas patients 3 years after nifurtimox treatment

Version: 2 Date: 19 December 2012

Reviewer: CAMILA GONZALEZ

Reviewer’s report:

Discretionary Revisions
The study is interesting and very useful; however one doubt arises: patients involved in the study had different treatment duration and most of them didn’t finish the 60-day treatment. Although the lack of a test of cure is clear, did you expect to see a variation in the response between those patients? For the porpoise of the study is it adequate to include all of them in the same group?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
